

# CARPET DEODORISER Ready to Use Deodorant

## PRODUCT INFORMATION SHEET

### DESCRIPTION:

**CARPET DEODORISER** contains strong odour counteractants and anti bacterial ingredients to eliminate carpet odours.

**CARPET DEODORISER** is a blend of alcohols, perfumes and quaternary ammonium compounds to neutralize pet, mildew and organic odours from carpets.

A regular spray of **CARPET DEODORISER** will provide adequate odour control for extended periods. Can also be used effectively as an air freshener and control of odour in garbage bins, on pet bedding, in toilets and washrooms, hotel bars to neutralize smoke and stale air, and in most areas where odour control is required.

### FEATURES AND BENEFITS:

- Consists of a recognized germicide, perfume concentrates and alcohol carriers
- Long lasting, kills odour causing bacteria, imparts fresh scent
- Formulated predominantly for use in carpet deodorizing but its use can be applied virtually anywhere odours occur.

### TECHNICAL INFORMATION:

<b>Appearance</b>	Water white liquid
<b>Odour</b>	Sweet odour
<b>pH</b>	7.00-8.00
<b>Specific Gravity</b>	0.990
<b>Percentage Volatiles</b>	87.0-87.5%
<b>Solubility in Water</b>	Infinite

### USE:

**Carpet:** As a re-odorant, spray a fine mist over the carpet and allow to dry. A regular spray in the corners of a room will provide odour control for extended periods. To provide full effectiveness of **CARPET DEODORISER** it should be sprayed directly onto the odour causing area to kill the bacteria – the cause of most odours. To help eliminate carpet mildew and organic odours caused by overwetting in the carpet extraction process add 10 – 20ml to the solution tank.

**Air Freshener:** Spray as an air freshener to sanitise, neutralize smoke and stale air and impart a fresh clean scent. Use in toilets and washrooms, gymnasiums, hotels, motels, schools, commercial buildings and domestic environments.

### SAFETY:

**First Aid:**

**Eyes:** If splashed in eyes, flush with water for 15min. Seek medical advice.

**Skin:** Wash affected area with soap and water.

**Inhalation:** If mists are inhaled, remove patient to fresh air. Seek medical advice.

**Swallowed:** Do NOT induce vomiting. Give milk or water to dilute. Seek medical advice.
